Management Discussion and Analysis

Dated as of May 21, 2015

INTRODUCTION

The following Management Discussion and Analysis ("MD&A") is management's assessment of Mountainview Energy Ltd.'s ("Mountainview" or the "Company") financial and operating results and should be read in conjunction with the reviewed interim financial statements of the Company for the three months ended March 31, 2015 and the audited financial statements and MD&A of the Company for the year ended December 31, 2014. This MD&A is presented in U.S. dollars (except where otherwise noted). Additional information relating to the Company can be found on www.sedar.com.

Mountainview Energy Ltd. ("Mountainview" or "the Company") was incorporated under the laws of the Province of British Columbia, Canada and was continued into the Province of Alberta in May, 2012. Its principal business is the exploration, acquisition, development and production of petroleum and natural gas reserves in the State of Montana, and the State of North Dakota, USA. The Company's shares are traded on the TSX Venture Exchange ("TSX-V") under the symbol "MVW" and the Company's head office is located at 33 First Avenue SW, Cut Bank Montana, U.S.A. The Company had the following direct and indirect wholly-owned subsidiaries at March 31, 2015.

- Mountainview Energy (USA) Ltd.
- Mountain View Energy, Inc.
- Mountainview Energy, LLC
- Mountain Divide, LLC
- Numbers, Inc.
- Mountainview Gathering Inc.
- Immgen Inc.
- DBD Investments Inc.
- MC2 Inc.

Non-GAAP Measures – Certain measures in this document do not have a standardized meaning as prescribed by IFRS, such as operating netback⁽¹⁾, funds flow from operations⁽²⁾, funds flow per share, and net debt⁽³⁾ and therefore are considered non-GAAP measures. These measures may not be comparable to similar measures presented by other issuers. These measures have been described and presented in this document in order to provide shareholders and potential investors with additional information regarding the Company's liquidity and its ability to generate funds to finance its operations. The term funds flow from operations or funds flow should not be considered an alternative to, or more meaningful than, cash flow from operating activities as determined in accordance with IFRS as an indicator of the Company's performance. Management's use of these measures has been disclosed further in this document as these measures are discussed and presented.

- (1) Operating netback is a non-GAAP measure calculated as the average per boe of the Company's oil and gas sales plus realized gains (losses) on derivatives, less royalties, production taxes, operating and transportation expenses.
- (2) Funds flow from operations should not be considered an alternative to, or more meaningful than, cash flow from operating activities as determined in accordance with International Financial Reporting Standards as an indicator of Mountainview's performance. Funds flow from operations represents cash flow from operating activities prior to changes in non-cash working capital, transaction costs and decommissioning provision expenditures incurred. Mountainview also presents funds flow from operations per share whereby per share amounts are calculated using weighted average shares outstanding consistent with the calculation of earnings per share.
- (3) Net debt is a non-GAAP measure representing the total of bank indebtedness, accounts payables and accrued liabilities, less accounts receivables, deposits and prepaid expenses.

Basis of Presentation – The reporting and measurement currency is the U.S. dollar.

boe Presentation – All calculations converting natural gas and natural gas liquids to barrels of oil equivalent ("boe") have been made using a conversion ratio of six thousand cubic feet (six "Mcf") of natural gas to one barrel of oil, and 42 gallons of natural gas liquids to one barrel of oil, unless otherwise stated. The use of boe may be misleading, particularly if used in isolation, as the conversion ratio of six Mcf of natural gas to one barrel of oil is based on an energy equivalency conversion method primarily applicable at the burner tip and does not represent a value equivalency at the wellhead. Given that the value ratio based on the current price of crude oil as compared to natural gas is significantly different from the energy equivalency of 6:1, utilizing a conversion on a 6:1 basis may be misleading as an indication of value.

GOING CONCERN

At March 31, 2015, the following conditions existed:

- 1. The Company had a working capital deficit of \$74,726,384 and does not anticipate generating sufficient funds from operations to fund its working capital deficit.
- 2. The Company incurred a loss from operations and accumulated deficit totaling \$2,485,955 and \$76,858,428 respectively for the period ended March 31, 2015.
- 3. Commodity prices had decreased by 57% over the second half of 2014 and have not yet recovered at March 31, 2015.

The Company has experienced losses in the periods ended and year ended March 31, 2015 and 2014. At March 31, 2015 and December 31, 2014, the Company had a deficit of \$76,858,428 and \$71,847,789 respectively, and a working capital deficit of \$74,726,384 and \$71,403,601 respectively. Continuing operations, as intended, are dependent on management's ability to raise required funding through future equity issuances, credit facilities, asset sales or a combination thereof, which is not assured, especially in current volatile and uncertain financial and commodity price environment. The sharp decline in commodity prices during the latter half of 2014 and which continued through the first quarter of 2015 materially reduced the revenues that were generated from the sale of oil and gas production volumes during these periods which, in turn, negatively affected the Company's working capital balance and the ability of the Company to secure additional financing. There is potential for future commodity prices to remain at current price levels for an extended period of time and should the current commodity price environment continue for a prolonged period of time, the Company will need to negotiate with its creditors to improve payment terms and/or pursue some form of asset sale, debt restricting, equity financing or other capital raising effort in order to fund its operations and to service its existing debt during the next twelve months. In addition, liens in the aggregate amount of \$7.9 million have been filed on the Company's assets. While these liens do not presently impact cash flow, the vendors who have filed the liens may, in fact, restrict cash flow from the wells under lien, further reducing the cash flow available to the Company. Any sale of assets with outstanding liens would require that the lien be cleared before title can be transferred. This condition also limits the proceeds of any potential asset sale. The Company is also in breach of debt covenants under the agreements governing the line of credit and credit facility. The line of credit and credit facility mature and are due and payable in 2015. Management of the Company is actively pursuing strategies to improve its working capital position and/or to reduce its future debt service costs, through the aforementioned means. The Company believes that these actions will mitigate the adverse conditions that the Company is facing; however, there is no certainty that these and other strategies will be successful or permit the Company to continue as a going concern.

These material uncertainties cast significant doubt on the Company's ability to continue as a going concern. If the Company is unable to restructure its debt in an acceptable manner, obtain additional adequate debt or equity financing or achieve adequate proceeds from the sale of assets, the Company will pursue all other legal avenues available to it with a view to improving the Company's financial situation in the best interests of the Company.

These audited consolidated financial statements do not include any adjustments to the recoverability and classification of recorded asset amounts and classification of liabilities and related expenses that might be necessary, should the Company be unable to continue as a going concern. Should the going concern assumption not be appropriate and the Company is not able to realize its assets and settle its liabilities, these statements would require adjustments to the amounts and classifications of assets and liabilities and these adjustments could be material.

FORWARD-LOOKING STATEMENTS OR INFORMATION

Certain statements contained in this MD&A constitute forward-looking statements or information within the meaning of securities laws. Forward-looking statements or information may relate to our future outlook and anticipated events or results and may include statements regarding the future financial position, business strategy, budgets, projected costs, capital expenditures, financial results, taxes and plans and objectives of or involving Mountainview. Particularly, statements regarding future operating results and economic performance are forward-looking statements. In some cases, forward-looking information can be identified by terms such as "may", "will", "should", "expect", "plan", "anticipate", "believe", "intend", "estimate", "predict", "potential", "continue" or other similar expressions concerning matters that are not historical facts.

These statements are based on certain factors and assumptions regarding, among other things, expected growth, results of operations, performance, business prospects and opportunities, the impact of increasing competition; the general stability of the economic and political environment in which Mountainview operates; the timely receipt of any required regulatory approvals; the ability of Mountainview to obtain qualified staff, equipment and services in a timely and cost efficient manner; the ability of Mountainview to issue debt or equity, to service debt and fund operations, the ability of Mountainview or the operator of the projects which Mountainview has an interest in to operate the field in a safe, efficient and effective manner; field production rates and decline rates; the ability to replace and expand oil and natural gas reserves through acquisition, development or exploration; the timing and costs of pipeline, storage and facility construction and expansion and the ability of Mountainview to secure adequate product transportation; future oil and natural gas prices; currency, exchange and interest rates; the regulatory framework regarding royalties, taxes and environmental matters in the jurisdictions in which Mountainview operates; and the ability of Mountainview to successfully market its oil and natural gas products. Readers are cautioned that the foregoing list is not exhaustive of all factors and assumptions which have been used. While we consider these assumptions to be reasonable based on information currently available to us, they may prove to be incorrect.

Forward looking-information is also subject to certain factors, including risks and uncertainties that could cause actual results to differ materially from what we currently expect. These factors include the ability of management to execute its business plan; general economic and business conditions; the risk of instability affecting the jurisdictions in which Mountainview operates; the risks of the oil and natural gas industry, such as operational risks in exploring for, developing and producing crude oil and natural gas and market demand; the possibility that government policies or laws may change or governmental approvals may be delayed or withheld; risks and uncertainties involving geology of oil and natural gas deposits; the uncertainty of reserves estimates and reserves life; the ability of Mountainview to add production and reserves through acquisition, development and exploration activities; Mountainview's ability to enter into or renew leases; potential delays or changes in plans with respect to exploration or development projects or capital expenditures; the uncertainty of estimates and projections relating to production (including decline rates), costs and expenses; fluctuations in oil and natural gas prices, foreign currency exchange rates and interest rates; risks inherent in Mountainview's marketing operations, including credit risk; uncertainty in amounts and timing of royalty payments; health, safety and environmental risks; risks associated with potential future law suits and regulatory actions against Mountainview; uncertainties as to the availability and cost of financing; and financial risks affecting the value of Mountainview's investments. Readers are cautioned that the foregoing list is not exhaustive of all possible risks and uncertainties.

All statements, other than statements of historical fact, which address activities, events, or developments that Mountainview expects or anticipates will or may occur in the future, are forward-looking statements within the meaning of applicable securities laws. These statements are subject to certain risks and uncertainties, and may be based on estimates or assumptions that could cause actual results to differ materially from those anticipated or implied.

Any financial outlook or future oriented financial information in this presentation, as defined by applicable securities legislation, has been approved by management of Mountainview. Such financial outlook or future oriented financial information is provided for the purpose of providing information about management's current expectations and plans relating to Mountainview Energy Ltd and its subsidiaries, drilling plans, production forecasts, operating costs or any future market activity. Readers are cautioned that reliance on such information may not be appropriate for other purposes.

Please see "Assessment of Business Risks" in this MD&A.

Additional information relating to Mountainview, including Mountainview's annual information form and financial statements can be found on SEDAR at www. <u>sedar.com</u> or the Company's website at: <u>www.mountainviewenergy.com</u>

INITIAL PRODUCTION

Any references in this MD&A to test rates, flow rates, initial and/or final raw test or production rates, early production, test volumes and/or "flush" production rates are useful in confirming the presence of hydrocarbons, however, such rates are not necessarily indicative of long-term performance or of ultimate recovery. Such rates may also include recovered "load" fluids used in well completion stimulation. Readers are cautioned not to place reliance on such rates in calculating the aggregate production for Mountainview. In addition, certain assets of Mountainview may be subject to high initial decline rates. While Mountainview discloses the initial results from new wells, the information disclosed herein should be considered preliminary and is not indicative of long-term performance. Ongoing technical work and operational enhancements are expected to continue to improve the Company's understanding of the ultimate potential of its assets.

PETROLEUM AND NATURAL GAS SALES

	Three months end	led March 31
(\$000's except per boe amounts)	2015	2014
Sales		
Light oil	1,996	6,020
Natural gas	36	88
Natural gas liquids	17	-
Total petroleum and natural gas sales	2,050	6,108
Average Daily Sales Volume		
Light oil (bbl/day)	627	778
Natural gas (mcf/day)	211	719
Natural gas liquids (boe/day)	17	-
Total (boe/day)	680	898
% oil production	92%	87%
% of natural gas production	5%	13%
Average Realized Commedity Prices		
Average Realized Commodity Prices Light oil (\$ per bbl)	35.36	85.28
Natural gas (\$ per mcf)	1.91	1.35
Natural gas liquids (\$ per boe)	11.31	-
Barrels of oil equivalent (\$ per boe)	33.51	75.01
Benchmark Pricing		
WTI crude oil (US\$ per bbl)	47.82	98.68
NYMEX natural gas (US\$ per mcf)	2.89	4.72
Exchange rate (US\$/Cdn\$)	1.26	1.10

Sales for the three months ended March 31, 2015 and 2014 were \$2 million and \$6 million respectively. This represents a decrease of \$4 million, or 66%, over the prior period quarter. Excluding the impact of derivative instruments, the average realized commodity price decreased from \$75.01 in the first quarter of 2014 to \$33.51 in the first quarter of 2015. The decrease in realized price is due to a lower WTI benchmark price, upon which the Company's sales contract is based. Compared to the prior period quarter, the WTI crude oil benchmark decreased \$50.86 per bbl, or 52%. The impact of the depressed commodity price was compounded by a production decrease due to normal decline activity. Average daily production volumes decreased by 218 boe/day, or 24%, when compared to the prior year quarter due to natural decline an interruptions in the field further discussed in Quarterly Financial Summary.

The Company has not targeted gas-based drilling, however the associated gas produced in Divide County is currently marketed and sold as natural gas liquids and residue gas. Natural gas sales currently account for 8% of production volumes, and 3% of sales revenue.

ROYALTIES

	Three months ended March	
(\$000's except per boe amounts)	2015	2014
Light oil	361	1,064
Natural gas	5	15
Natural gas liquids	3	-
Total royalties	369	1,079
Total royalties per boe	6.04	13.24
% of P&NG Sales	18%	18%

Royalties for the three months ended March 31, 2015 and 2014 were \$0.4 million and \$1.1 million, respectively. As a percentage of sales, the average royalty rate for the comparative periods stayed consistent at 18%, which reflects a blended rate of the Company's North Dakota and Montana operations. The average royalty rate in Divide County, North Dakota ranges from 18% to 21%, which is the source of 80% of the Company's production.

PRODUCTION TAXES

	Three months ended March 31	
(\$000's except per boe amounts)	2015	2014
Production taxes	180	534
Production taxes per boe	2.94	6.55
% of P&NG Sales	9%	9%

Production taxes are calculated as a percentage of revenues or volumes depending on the state laws of the producing assets and are payable to the state governments in Montana and North Dakota where Mountainview operates. For the three months ended March 31, 2015 and 2014, production taxes were 9% of petroleum and natural gas sales as the Company's tax rates and product mix have remained consistent from the prior period.

OPERATING AND TRANSPORTATION COSTS

	Three months ended March 31	
(\$000's except per boe amounts)	2015	2014
Operating costs excluding water disposal	823	849
Water disposal costs	863	890
Transportation costs	31	-
Total operating and transportation costs	1,717	1,738
Operating costs excluding water disposal per boe	13.46	10.42
Water disposal costs per boe	14.11	10.93
Transporation costs per boe	0.50	-
Total operating and transportation costs per boe	28.07	21.35

Operating and transportation costs were \$1.7 million or \$28.07 per boe for the quarter ended March 31, 2015 compared to \$1.7 million or \$21.35 per boe for the quarter ended March 31, 2014.

It is imperative in the Divide County Three Forks play to adequately manage water disposal costs as they comprise approximately 50% of total operating costs. In efforts to reduce water disposal costs, the Company has entered into a contract with third party service provider to install salt water disposal lines which will transport the produced water to an existing salt water disposal well, which is owned by the service provider. The installation of the salt water disposal system was completed in Q4, 2014 and is now operational on six of the company's nine wells. The price per barrel of water disposed under the contract is 50% less than the previous contract in place, however a monthly volume minimum reduced the realized savings in the first quarter of 2015. Subsequent to quarter end, management successfully renegotiated the contract to extend the minimum volume requirement through the contracted disposal line(s). In addition to removing the volume requirement management also negotiated a 36% reduction per barrel of water produced on the remaining 3 wells trucked to a disposal system. Management plans on hooking up the remaining three wells to a piped disposal system in the near future, however, due to current cash flow constraints these capital expenditures are considered discretionary.

Management has also electrified six of the nine wells with electrification of the seventh well occurring on May 13, 2015. Management plans to electrify the last location of the two remaining wells however considers the expenditure discretionary due to current cash flow constraints. Cost reductions in relation to the electrification of the seventh well will be partially realized in Q2 2015 and fully realized in Q3 2015 onwards.

Operating costs, excluding water disposal costs, decreased \$0.25 million when compared to the prior year quarter; however, management saw the per boe costs increase by 30%. This per boe increase is a result of fixed costs distributed over a 24% decrease in production volume.

GENERAL AND ADMINSTRATIVE ("G&A") EXPENSES

	Three months ended March 31	
(\$000's except per boe amounts)	2015	2014
Legal and accounting	153	45
G&A expense excluding legal and accounting	415	643
Capitalized G&A expense	(83)	(42)
Net G&A	486	646
Total net G&A expense per boe	7.94	7.93

General and administrative expenses, net of recoveries and capitalized G&A, were \$0.5 million or \$7.94 per boe for the current quarter, and \$0.6 million or \$7.93 per boe for the quarter ended March 31, 2014, representing a 25% decrease. Legal and accounting costs have increased on a quarter over prior period quarter basis. Management continues to assess its strategic alternatives and monitor the existing liens on its asset base. This process requires ongoing consultations with legal counsel. Management is pleased to report that it has achieved its goal of reducing monthly G&A below \$0.2 million per month, as discussed in the 2014 Q4 Management Discussion and Analysis. The Company continues to evaluate its G&A budget as further cuts may be needed to continue operations in the current commodity price environment.

SHARE-BASED PAYMENT EXPENSE

	Three months ended March 31		
(\$000's except per boe amounts)	2015	2014	
Share based payment expense	45	106	
Total per boe	0.73	1.30	

During the three months ended March 31, 2015 and 2014, the Company expensed \$0.05 million and \$0.1 million in share-based payment expense, respectively.

Although no options were granted in 2015 or 2014, the options granted in prior years vest over a 3 year period. Accounting treatment of the share-based payment expense recognizes more expense in earlier years than later years.

At March 31, 2015, the Company has 6,320,000 options outstanding, of which 5,365,694 had vested and were exercisable. At May 20, 2015, there are no vested options priced below the market price of the common shares of the Company.

FINANCE EXPENSE

	Three months end	ed March 31
(\$000's except per boe amounts)	2015	2014
Interest and bank charges	-	7
Interest on term loan	123	-
Interest on line of credit	-	185
Interest on long-term debt	2	1
Interest on credit facility	974	734
Finance costs on credit facility	-	2
Finance costs	108	-
Interest on convertible debenture (non cash)	25	22
Interest on promissory notes (non cash)	229	196
Accretion on decommissioning liabilities (non cash)	17	30
Accretion on credit facility (non cash)	558	643
Total Finance expense	2,035	1,820
Finance expense per boe	17.97	11.41
Finance expense (non cash) per boe	13.55	10.95

For the three months ended March 31, 2015, finance charges were \$2.0 million as compared to \$1.8 million for the period ended March 31, 2014. This increase is due to increased bank debt for the quarter, which was \$59.6 million compared to \$54.8 million in the prior period quarter. Interest on the promissory notes with a face value of \$8.9 million, and interest on the convertible debentures with a face value of \$2.1 million. Interest on the promissory notes and convertible debenture is accrued quarterly and due at maturity in July 2016.

The Company's current interest charge on the credit facility is a floating rate with a minimum of 8.0%. The Company's promissory notes pay interest rates ranging from 5.0% to 9.0% and the convertible debentures pay an interest rate of 5.0% annually. The combined effective interest rate for the quarter was 7.1%.

DERIVATIVE ACTIVITIES

As part of the financial management strategy to protect cash flows available for capital expenditures, the Company has adopted a commodity price risk management program. The purpose of the program is to stabilize and hedge future cash flow against the unpredictable commodity price environment, with an emphasis on protecting downside risk. In Q4 2013, a direct wholly-owned subsidiary of Mountainview, Mountain Divide, LLC, entered into an eighteen month crude oil collar for January 2014 through June 2015 with a floor of \$85.00 per barrel and a ceiling of \$97.70 per barrel.

With derivative instruments, there is a risk that the counterparty could become illiquid or that Mountainview may not have the actual sales volumes to offset the hedge position. To manage risk, the Company's counterparties on derivative instruments are major international banks.

Realized gains and cash proceeds

The Company recognized a realized gain (loss) of \$0.4 million or \$7.14 per boe and \$(0.03) million or \$(0.40) per boe for the quarter, ended March 31, 2015 and 2014 respectively.

Unrealized derivative assets and liabilities

The Company has recognized an unrealized loss on financial derivatives in the amount of \$0.3 million and \$0.1 million for the quarters ended March 31, 2015 and 2014 respectively. This unrealized loss is due to an increase in forward WTI pricing in the second half of 2015.

The following is a summary of the derivative as at March 31, 2015:

	Three months ended March 31	
(\$000's except per boe amounts)	2015	2014
Realized gain (loss)	436	(32)
Unrealized loss	(308)	(98)
Gain (loss) and proceeds	129	(130)
Realized gain (loss) on derivatives per boe	7.14	(0.40)
Unrealized loss on derivatives per boe	(5.03)	(1.20)
Gain (loss) on derivative per boe	2.10	(1.60)

The following table outlines the volumes hedged for the remainder of the contract:

Month	Monthly barrel (bbl) quantity	Prices	(\$bl	bl)
		Floor		Ceiling
April 1, 2015	4,000	\$ 85.00	\$	97.70
May 1, 2015	4,000	\$ 85.00	\$	97.70
June 1, 2015	4,000	\$ 85.00	\$	97.70
	12,000	\$ 85.00	\$	97.70

DEPLETION, DEPRECIATION & IMPAIRMENT

	Three months ended March 31		
(\$000's except per boe amounts)	2015	2014	
Depletion & depreciation	1,109	1,382	
Depletion & depreciation per boe	18.14	16.97	

For the quarters ended March 31, 2015 and 2014, depletion and depreciation of capital assets was \$1.1 million and \$1.4 million, respectively. On a per boe basis, the quarter over prior period quarter increase relates to a 24% decrease in production, despite a reduced oil and gas asset balance.

There were no impairment indicators noted for property, plant and equipment or exploration and evaluation assets during the quarter.

NET AND COMPREHENSIVE LOSS

	Three months ended	March 31
(\$000's except per share amounts)	2015	2014
Net loss	(5,011)	(1,542)
Net loss per share	(0.06)	(0.02)

The net and comprehensive loss for the quarters ended March 31, 2015 and 2014 was \$5 million and \$1.6 million respectively. The net loss was driven by a decreased commodity price environment as the Company's realized price decreased by 55% from the prior period quarter.

FUNDS FLOW FROM OPERATIONS AND NETBACKS

	Three months ended March 31	
(\$000's except per share amounts)	2015	2014
Cash flow from operating activities	712	(935)
Change in non-cash working capital	(3,591)	1,245
Funds flow	(2,879)	310
Funds flow per share	(0.03)	0.00

In the current price environment funds flow from operations for the quarter ended March 31, 2015 was \$(2.9) million (\$(0.03) per share) compared to \$0.3 million (\$(0.00) per share), for the period ended March 31, 2014. This decrease primarily relates to low commodity pricing despite operating and general and administrative cost savings on quarter over prior year quarter basis.

The commodity price environment has also impacted Mountainview's operating netbacks. On a per boe basis the Company's operating netback has decreased \$8.11 since year end December 31, 2014 and \$30.55 when comparing to the quarter ended March 31, 2014. Realized price for the same period comparison has decreased \$27.65 and \$41.49, respectively.

The following table summarizes netbacks for the past eight quarters on a barrel of oil equivalent basis:

(\$ per boe)	Q1 2015	Q4 2014	Q3 2014	Q2 2014	Q1 2014	Q4 2013	Q3 2013	Q2 2013	Q1 2013
Petroleum and natural gas sales	33.51	61.16	82.40	91.06	75.01	68.16	83.47	73.72	66.45
Realized gain (loss) on derivatives	7.14	2.55	(0.39)	(0.57)	(0.40)	-	-	-	-
Royalties	(6.04)	(10.58)	(16.84)	(14.99)	(13.02)	(13.49)	(12.96)	(11.57)	(7.77)
Production and operating expense	(31.01)	(41.41)	(36.73)	(33.71)	(27.43)	(20.08)	(26.57)	(29.73)	(21.40)
Operating netback ⁽¹⁾	3.61	11.72	28.44	41.79	34.16	34.59	43.94	32.42	37.28
General and administrative expense	(7.94)	(11.52)	(10.05)	(8.05)	(7.80)	(8.05)	(5.25)	(7.72)	(16.43)
Interest and bank charges	(33.28)	(24.87)	(23.54)	(25.77)	(21.98)	(11.50)	(28.21)	(15.89)	(24.95)
Funds flow from operations	(37.62)	(24.67)	(5.15)	7.97	4.38	15.04	10.48	8.81	(4.10)

(1) Operating netback is a non-GAAP measure calculated as the average per boe of the Company's oil and gas sales plus realized gains (losses) on derivatives, less royalties, production taxes, operating and transportation expenses.

	Three months end	ed March 31
(\$000's except per boe amounts)	2015	2014
Land acquisition	6	126
Drilling and completion	-	6,535
Intangible equipment and facilities	260	-
Tangible equipment and facilities	75	1,196
Development capital	341	7,857
Net other additions (disposals) to PP&E	(304)	52
Corporate acquisitions to PP&E	-	1
Total net additions to PP&E	37	7,910

 Capital expenditures is a non-GAAP measure and is defined as the total cash consideration paid or received for property acquisitions and dispositions, plus development and exploration capital expenditures.

(2) Net other additions to PP&E reconciles the Non-GAAP Capital Expenditures measure to the IFRS measure of capital additions, and is the net adjustments made to account for the assets purchased under IFRS 3 - Business Combinations, assets sold for cash, reclassification of E&E assets, and corresponding changes in PP&E due to changes in the decommissioning liability.

During the period ended March 31, 2015, the Company invested \$0.3 million on development capital, a decrease of \$7.5 million from \$7.9 million in development capital invested in the first quarter of 2014. The Company's development capital expenditures for the period ended March 31, 2015 were focused on equipment and facility improvements in Divide County.

Mountainview plans to complete its two remaining standing wells in Divide County as soon as capital becomes available and the commodity price improves; however, due to current cash flow constraints, management considers these expenditures to be discretionary. The Company plans to finance continued development operations from its continued efforts to close the previously announced equity offering and/or its pursuit in securing new debt financing. The budgeted gross cost for completion operations is \$1.8 million per well (\$1.2 million net).

Drilling Results

		March 31,						
	20	15	20	14				
	Gross	Net	Gross	Net				
Crude oil	-	-	2.0	1.9				
Dry and abandoned	-	-	-	-				
Total	-	-	2.0	1.9				
Success Rate %		-		100%				

Land Holdings

The Company continues to hold undeveloped acreage in the Stateline, South Alberta Bakken "SAB" and Divide County projects. In addition to the undeveloped acreage future development is possible on the held by production acreage "HBP" for both SAB and Divide County as both areas have other prospective pay zones. Due to current cash flow constraints management considers any future development in all areas to be discretionary. Current land holdings, gross and net are outlined below.

		Marc 20			nber 31, 014	
	Stateline	SAB	Stateline	SAB	Divide County	
Gross acres undeveloped	8,560	35,824	4,804	8,560	37,854	6,087
Net acres undeveloped	4,602	31,189	2,383	4,602	33,027	3,610
Gross acres HBP	528	35,231	12,741	528	35,231	12,741
Net acres HBP	337	30,707	8,313	337	30,707	8,313
Total gross acres undeveloped & HBP	9,088	71,055	17,545	9,088	73,086	18,828
Total net acres undeveloped & HBP	4,939	61,896	10,696	4,939	63,734	11,922

The Company's undeveloped land holdings have decreased from December 31, 2014, as acreage expiries were recognized.

The table below outlines the timing of future expirations of the remaining undeveloped SAB and Divide County acreage if drilling in the area does not continue.

	Net Acres						
	Stateline	SAB	Divide County				
2015 Expirations	4,342	4,657	1,983				
2016 Expirations	260	13,153	400				
2017 Expirations		3,117	-				
2018 Expiration	-	1,300	-				
2020 Expirations	-	360	-				
2021 Expirations	-	8,601	-				
	4,602	31,189	2,383				

QUARTERLY FINANCIAL SUMMARY

(\$000's except per share amounts)	Q1 2015	Q4 2014	Q3 2014	Q2 2014	Q1 2014	Q4 2013	Q3 2013	Q2 2013	Q1 2013

(1) Operating netback is a non-GAAP measure calculated as the average per boe of the Company's oil and gas sales plus realized gains (losses) on derivatives, less royalties, production taxes, operating and transportation expenses.

- (2) Funds flow from operations should not be considered an alternative to, or more meaningful than, cash flow from operating activities as determined in accordance with International Financial Reporting Standards as an indicator of Mountainview's performance. Funds flow from operations represents cash flow from operating activities prior to changes in non-cash working capital, transaction costs and decommissioning provision expenditures incurred. Mountainview also presents funds flow from operations per share whereby per share amounts are calculated using weighted average shares outstanding consistent with the calculation of earnings per share.
- (3) Due to the anti-dilutive effect of Mountainview's net loss for the three months ended March 31, 2015 and 2014, the diluted number of shares is equal to the basic number of shares. Therefore, diluted per share amounts of the net loss are equivalent to basic per share amounts.
- (4) Capital expenditures is a non-GAAP measure, calculated as the purchase or sale price of an asset, plus development capital expenditures added to PP&E. Corporate acquisitions are excluded from this measure.
- (5) Net debt is a non-GAAP measure representing the total of bank indebtedness, accounts payables and accrued liabilities, less accounts receivables, deposits and prepaid expenses.

Quarterly variances in sales are connected to changes in production volumes and prices. In Q1 2014, the Company added production volumes with the completion and tie-in of two wells. In Q1 2015, average daily production was 680 boe/day compared to 898 boe/day from the prior year quarter. In addition to normal decline activity during the current quarter, there were also some lengthy field interruptions. Two of the Company's nine wells were down due pump failure and replacement as well as water disposal hook up. The first well was down 20 days in the month of January, the second well was down 13 days in the month of February and 15 days in the month of March.

The production profile of a Three Forks (Torquay) well demonstrates initial flush production rates, with a significant decline in the first months of the production life. The production rate then stabilizes and the wells produce for an extended reserve life with relatively low decline rates. In Q1 2014, the Company realized these expected declines from initial production rates on six of the nine wells. In Q1 2015 this expected decline were realized on the well completed in Q4 2014. While the Company works to minimize production interruptions, various wells were intermittently shut in for short periods of time over the last year. The conversion of wells to a Rotoflex pumping unit and the ninth well coming on line contributed to the increased average daily production rate for the quarter ended December 31, 2014.

Through its strategy to protect cash flows, a direct wholly-owned subsidiary of Mountainview, Mountain Divide, LLC hedges a percentage of production using financial derivatives. As such, commodity price swings in oil have a moderated effect on funds flow from operations, as only current quarter realized cash gains or losses are included.

Funds flow from operations grew with production throughout 2012 and 2013 as production increased from drilling operations in Divide County, North Dakota. This increase in production was accompanied by an increase in produced water, and also required pump changes to optimally handle the expected long term fluid levels. Currently, six of nine producing wells operated by the Company have been converted to the Rotoflex pump. See further discussion regarding operating expenses in the "Operating and Transportation Costs" section of this document.

Quarterly variances in net income, however, are largely driven by commodity price variance, financing costs and non-cash items, such as depletion, impairment, lease expiries, and unrealized gains or losses on derivatives. The Company funded its initial eight well program with debt, resulting in increased financing expenses as wells were drilled and completed. The net loss in Q1 2015 was largely due to financing costs, lower realized oil prices and lease expirations.

LIQUIDITY AND CAPITAL RESOURCES

The Company's objective when managing capital is to maintain a conservative, yet flexible structure which will allow it to execute on its capital program. The Company actively monitors its capital structure through cash flow from operating activities before changes in non-cash working capital, which drives current and forecasted net debt levels. In forecasting these amounts, the Company includes economic conditions; investment opportunities; past and forecasted capital investment efficiencies; and current and forecasted petroleum and natural gas prices.

In order to manage the capital structure, the Company will focus on its forecasted debt to forecasted cash flow from operating activities (before changes in non-cash working capital) ratio; the current level of available credit under the bank facility; the level of bank credit that may be obtainable as a result of crude oil and natural gas reserve growth; the availability of other sources of debt; issuing new common equity if available on favorable terms; the sale of assets; and limiting the size of the investment program.

The Company's share capital is not subject to external restrictions; however, its credit facility value is based primarily on its petroleum and natural gas reserves and there are covenants Mountainview must comply with which are detailed below. The Company was not in compliance with all of its debt covenants at the end of the reporting period, see further discussion below regarding covenant breaches by debt instrument. The Company confirms there are no off-balance sheet financing arrangements.

Term Loan

On April 17, 2012, the Company entered into a revolving line of credit for \$5,500,000 and on June 27, 2012, increased the line of credit to \$8,700,000. During the year ended December 31, 2014, the line of credit was converted to a term loan extending the maturity date from October 17, 2014 to November 1, 2015. The outstanding balance at March 31, 2015 and December 31, 2014 was \$8,520,531 and \$8,660,000 respectively. The Company's US subsidiary provided a general security over its assets as collateral for the line of credit and, a director and officer of the Company and major shareholder have provided personal guarantees. Carrying value of the collateral at March 31, 2015 was \$3,609,138. The minimum interest rate is 5.25%. Repayment terms are monthly principal and interest payments of \$110,900. At March 31, 2015 the Company was in default due to nonpayment. At this time the bank has not taken any formal action to exercise its rights and/or remedies under the credit agreement, nor has it applied the Default Rate. The Company continues to communicate with the bank and is currently engaged in negotiations with the bank to reach a solution that would allow for repayment terms that would rectify the defaults, while still providing the Company with adequate cash flow to meet its ongoing obligations.

Convertible debenture

On May 28, 2012, the Company acquired from a related company owned by a director and officer in common, a compressor, plant and equipment for consideration of \$2,660,000. The Company paid \$283,000 and agreed to issue a \$2,377,000 debenture convertible into common shares of the Company at a price of \$2.50 per common share (the actual convertible debenture issued was \$2,072,053, which was reduced by costs incurred of \$304,947 on behalf of the related company prior to the transaction closing). During the year ended December 31, 2013 the original convertible debenture was cancelled and a new convertible debenture was signed to extend the maturity date to June 1, 2015. In the year ended December 31, 2014 an amendment to the debenture was issued extending the maturity date to July 1, 2016 all other terms remained unchanged. At March 31, 2015 the convertible debenture was \$2,072,053 plus accrued interest of \$251,940. Principal and interest payments are due at maturity. At March 31, 2015, if the convertible debenture had been converted the Company would have issued 919,924 additional common shares.

Credit Facility

The Company entered into a senior secured advancing credit facility (the "Facility") for up to a maximum of \$75.0 million. At March 31, 2015 the Company had \$49.4 million drawn with no additional funds available on this facility. The Facility matures on July 1, 2015, and amounts borrowed bear interest at a floating rate with an 8% minimum. Monthly repayments of outstanding interest plus principal are required based on 85% of net profits from the 12-Gage Project. In connection with the Facility, the lender and the Company will have an area of mutual interest ("AMI"), which will be in northern Divide County, North Dakota. In addition, pursuant to the Facility, upon the earlier of the maturity date or the date the Facility is paid in full, the Lender will trigger the start of a 39% after pay-out net profits interest (the "NPI") in all of the Company's oil and gas properties within Divide County, North Dakota.

The NPI is defined as all revenues, less all operating costs, production taxes, and capital costs incurred by the Company. Payments on the NPI commence upon repayment in full of the outstanding Facility. The NPI will be reduced from 39% to 20% once the lender achieves a 0.65 x return on investment. Return on investment is based on principal plus interest and fees. At March 31, 2015 the return on investment required to trigger this reduction in NPI is \$36.2 million. The Facility is secured by a first priority mortgage and security interest in the 12 - Gage properties. The carrying amount of the collateral is \$47,341,540. The borrowing base under the Facility will be subject to re-determination in the absolute discretion of the lender. The Company's US subsidiary, Mountain Divide LLC, is required to maintain a current ratio of 1.0: 1.0. At March 31, 2015 the US subsidiary's current ratio excluding the credit facility balance was 0.26:1.0, which results in a covenant breach.

For the period ended March 31, 2015, the Company incurred fees of \$Nil (\$61,591 – December 31, 2014) representing 1.25% of the borrowing base increase to the lender. A finder's fee was also incurred in conjunction with Facility. The finder's fee is payable at a rate of 4% based on each borrowing base increase up to the total amount available of \$75.0 million, \$1.31 million was accrued at March 31, 2015.

During the period ended March 31, 2015, the Company received proceeds of \$Nil (December 31, 2014 - \$13,218,423) under the Facility. The transaction has been recorded as a borrowing and a sale of conveyance relating to the 20% NPI. The Company has determined the fair value of the conveyance portion of the arrangement using a relative percentage of the conveyed property's fair value determined at its acquisition date and has recorded this amount of \$2,661,585 (December 31, 2014 - \$2,661,399) as an adjustment to the property. The residual amount of the initial proceeds has been determined to be a borrowing and has been recorded as a current liability based upon the expected terms of repayment. The discount to the face amount of the debt will be accreted over the term of the Facility. At March 31, 2015, the Company owed \$49,390,022 under the Facility. During the period ended March 31, 2015, the Company has repaid \$4,458 of the principal and has paid or accrued \$974,296 in interest.

As noted above, at March 31, 2015 the Company is in default due to the following covenant breaches (1) the current ratio covenant, (2) the covenant which requires prompt and timely payment of trade vendors, and (3) the covenant requiring all oil and gas assets to be free of liens (Note 8). The lender has been notified of these breaches and is working with management towards a comprehensive solution. At this time the bank has not taken any formal action to exercise its rights and/or remedies under the credit agreement nor has it applied the default rate. The Company continues to communicate with the bank and is currently engaged in negotiations with the bank to reach a solution that would allow for repayment terms that would rectify the defaults, while still providing the Company with adequate cash flow to meet its ongoing obligations.

	March 31, 2015	December 31, 2014
Balance, beginning of period	\$ 50,539,132	\$ 38,203,410
Proceeds received	-	13,218,423
Principal payments	(4,458)	(3,107,389)
Conveyance Fee	(186)	148,850
Accretion	558,105	2,350,825
Interest accrual (payment)	-	(274,987)
Balance, end of period	\$ 51,092,593	\$ 50,539,132

The following table reconciles the face value of the credit facility to the carrying value:

Long-term debt

The Company has various vehicle loans outstanding as of March 31, 2015 and December 31, 2014 with balances of \$231,269, and \$391,042 respectively. The current portion of vehicle loans as at March 31, 2015 and December 31, 2014 is \$87,058 and \$126,319. There are nine vehicle loans with fixed rates that vary from 0% interest to 3.90% and will be repaid after five years.

Promissory notes

The Company entered into two unsecured promissory notes payable with major shareholders of the Company, each for \$4,000,000 (total \$8,000,000), bearing interest at 9% per annum and drawdown of the full principal balance. The principal was payable on or before May 30, 2015. During the year ended December 31, 2014, amendments to the promissory notes were executed extending the maturity to July 1, 2016. At March 31, 2015, the balance due on the promissory notes was \$7,850,000 plus accrued interest of \$1,832,799. Principal and interest payments are due at maturity.

On March 12, 2013, the Company entered into two unsecured promissory notes payable with major shareholders of the Company and a Company with a director and officer in common, for \$250,000, bearing interest at 5% per annum. The principal was payable on or before March 12, 2015. During the year ended December 31, 2014, amendments to the promissory notes were executed extending the maturity to July 1, 2016. At March 31, 2015, the balance due on the promissory notes is \$250,000 plus accrued interest of \$26,329. Principal and interest payments are due at maturity.

On November 26, 2013, the Company signed three unsecured promissory notes payable with a major shareholder of the Company, for \$460,949, \$248,205, and \$96,000, bearing interest at 9% per annum. The principal was payable on or before March 15, 2015, May 7, 2015 and June 6, 2015. During the year ended December 31, 2014, amendments to the promissory notes were executed extending the maturity to July 1, 2016. At March 31, 2015, the balance due on the promissory notes is \$805,154 plus accrued interest of \$150,506. Principal and interest payments are due at maturity.

							After
At March 31, 2015	Total	< 1 Year	1-3 years	4-	5 years	5	years
Credit facility	\$ 51,092,593	\$51,092,593	\$-	\$	-	\$	-
Term loan	8,520,531	8,520,531	-		-		-

Vehicle loans	231,269	87,058	142,374		1,837		-
Total contractual obligations	\$ 73,083,175	\$ 59,700,182	\$ 13,381,156	\$	1,837	\$	-

The following is a schedule of debt payments over the next five years:

SHARE CAPITAL

In the first quarter of 2015, there were no shares issued on account of vested share purchase options that were exercised.

As at March 31, 2015 the Company has 87,820,443 Common Shares, 6,320,000 stock options and 7,822,727 class B shares in a subsidiary outstanding. The Class B shares can be exchanged at the option of the holder, on a share for share basis with common stock of the Company or, at the option of the Company, be paid by cash at the current market value calculated as weighted average price per common stock of the Company for 20 consecutive trading days of the TSX-V. The exchange dates are as follows:

- September 4, 2012 to June 4, 2013 33%
- September 5, 2013 to June 5, 2014 66%
- September 6, 2014 to June 7, 2019 100%
- September 8, 2019 to June 9, 2022 100% (mandatory exchange or payable by cash)

The effect of Class B shares has not been included in the EPS for the periods ended March 31, 2015 and 2014. At March 31, 2015 none of the shares have been exchanged.

In addition, there is a convertible debenture outstanding which, if converted at March 31, 2015, would have resulted in the issuance of 919,924 Common Shares.

CONTRACTUAL OBLIGATIONS AND CONTINGENCIES

The Company enters into short term contractual obligations in the normal course of business, including purchase of assets and services, operating agreements, transportation commitments, sales commitments, royalty obligations, lease rental obligations and employee agreements. These obligations are of a recurring, consistent nature and impact cash flows in an ongoing manner.

Mountainview also has long-term contractual obligations and commitments. The Company is responsible for the retirement of long-lived assets related to its oil and gas properties at the end of their useful lives. Mountainview has recognized a liability of 2.7 million (March 31, 2014 - 2.5 million) based on current legislation and estimated costs. Actual costs may differ from those estimated due to changes in legislation or actual costs.

								After		
At March 31, 2015		< 1 Year		1-3 years		3-5 years		5 years		Total
Trade and accrued liabilities	\$ 3	19,666,597	\$	-	\$	-	\$	-	\$	19,666,597
Term Ioan - principal ⁽¹⁾		8,520,531		-		-		-		8,520,531
Long-term debt		87 <i>,</i> 058		142,374		1,837		-		231,269
Credit facility - principal ⁽¹⁾		49,459,290		-		-		-		49,459,290
Convertible debenture - principal ⁽²⁾		-		2,072,053		-		-		2,072,053
Convertible debenture - interest ⁽²⁾		-		205,318		-		-		205,318
Promissory notes - principal		-		8,905,154		-		-		8,905,154
Promissory notes - interest		-		2,009,635		-		-		2,009,635
Total	\$	77,733,476	\$	13,334,534	\$	1,837	\$	-	\$	91,069,847

Additional contractual obligations and commitments are as follows:

Repayment of this principal amount in less than one year is based on the terms of the credit agreement.
 Repayment of the Convertible Debentures assumes that all holders of the debentures will not convert their holdings into shares.

RELATED PARTY TRANSACTIONS

During the period ended March 31, 2015 the Company paid or accrued \$2,021,527. (March 31, 2014 - , \$1,133,995) to seven companies owned by one of its major shareholders for services provided in the drilling and operating of the wells in the 12-Gage Project. These services have occurred in the normal course of business and are measured at their exchange amount. On January 23, 2015 five of the seven companies had filed liens on the Company's oil and gas assets in the total amount of \$1,628,329. While these liens do not presently impact cash flow, the vendors who have filed the liens may, in fact, restrict cash flow from the wells under lien, further reducing the cash flow available to the Company

During the period ended March 31, 2015, the Company had a joint interest receivable of \$14,393 (March 31, 2014 - \$407,826) from two companies owned by two of its major shareholders. The companies are participants in certain joint venture activities.

During the period ended March 31, 2015, the Company had net a joint interest receivable of \$29,024 and had paid or accrued \$48,577 (March 31, 2014 - \$60,774 and \$48,577) from/to three companies owned by a Director and officer in common. The companies are participants in certain joint venture activities.

ASSESSMENT OF BUSINESS RISKS

The following are the primary risks associated with the business of Mountainview. These risks are similar to those affecting other companies competing in the conventional oil and natural gas sector. Mountainview's financial position and results of operations are directly impacted by these factors and include:

Operational risk associated with the production of oil and natural gas:

- the ability of the corporation to continue operating as a going concern
- continued participation of Mountainview's lenders despite debt covenant breaches. Mountainview seeks to mitigate these risks by:
 - acquiring properties with established production trends to reduce technical uncertainty as well as undeveloped land with development potential;
 - maintaining a low cost structure to maximize product netbacks and reduce impact of commodity price cycles;
 - diversifying properties to mitigate individual property and well risk;
 - maintaining product mix to balance exposure to commodity prices;
 - conducting rigorous reviews of all property acquisitions;
 - monitoring pricing trends and developing a mix of contractual arrangements for the marketing of
 products with creditworthy counterparties;
 - maintaining a hedging program to hedge commodity prices with creditworthy counterparties;
 - adhering to the Company's safety program and adhering to current operating best practices;
 - keeping informed of proposed changes in regulations and laws to properly respond to and plan for the effects that these changes may have on our operations;
 - carrying industry standard insurance;
 - establishing and maintaining adequate resources to fund future abandonment and site restoration costs; and
 - monitoring our joint venture partners' obligations to us and cash calling for capital projects to limit the Company's credit risk.
- commodity risk as crude oil and natural gas prices fluctuate due to market forces;
- the ability of the Company to obtain new funding to meet the funding requirements of future capital programs which would be needed to ensure cash flow from reserves will be sufficient to cover ongoing activities
- the Company's level of indebtedness reduces financial flexibility
- reserve risk in respect to the quantity and quality of recoverable reserves;
- exploration and development risk of being able to add new reserves economically
- market risk relating to the availability of transportation systems to move the product to market;
- financial risk such as volatility of the Canadian/U.S. dollar exchange rate, interest rates and debt service obligations;
- environmental and safety risk associated with well operations and production facilities;
- changing government regulations relating to royalty legislation, emissions, income tax laws, incentive programs, drilling and operating practices and environmental protection relating to the oil and natural gas industry
- fluctuations in the Company's market price per share or potential dilution resulting from any future acquisitions or financings
- litigation, in the normal course of operations, the Company may be come party to or be the subject of legal proceedings.

- breach of confidentiality, while discussing potential business relations or transactions with third parties the Company may disclose confidential information.
- management growth, can management continue to grow its internal systems as needed and retain key personnel to ensure proper controls and financial systems are in place at all times

CRITICAL ACCOUNTING JUDGEMENTS, ESTIMATES AND ACCOUNTING POLICIES

For more details regarding the Company's critical accounting judgments, estimates and accounting policies the following should be read in conjunction with the Company's 2014 audited financial statements.

Management is required to make judgments, estimates and assumptions in the application of accounting policies that could have a significant impact on our financial results. Actual results may differ from those estimates and those differences may be material. The estimates and assumptions used are subject to updates based on experience and the application of new information. The Company's critical accounting policies and estimates are reviewed annually by the Audit Committee of the Board of Directors of the Company. Further details on the basis of presentation and significant accounting policies can be found in the Company's notes to the Consolidated Financial Statements and annual MD&A for the year ended December 31, 2014.

Critical Accounting Judgments in Applying Accounting Policies

Critical judgments are those judgments made by Management in the process of applying accounting policies that have the most significant effect on the amounts recognized in the Company's annual and interim Consolidated Financial Statements and accompanying notes. On January 1, 2014, as required, the Company adopted the amendments to IAS 32 and IFRIC 21. See discussion below under Changes in Accounting Policies for details. Further information on Management's critical accounting judgments in applying accounting policies can be found in the notes to the Consolidated Financial Statements for the year ended December 31, 2014.

Critical accounting estimates

Critical accounting estimates are those estimates that require Management to make particularly subjective or complex judgments about matters that are inherently uncertain. Estimates and underlying assumptions are reviewed on an ongoing basis and any revisions to accounting estimates are recognized in the period in which the estimates are revised. For 2014, the Company had a change in estimate related to its depletion calculation, see Note 5 in the Consolidated Financial Statements for the year ended December 31, 2014.

Changes in Accounting Policies

The Company adopted several new IFRS interpretations and amendments in accordance with the transitional provisions of each standard. A brief description of each new accounting policy and its impact on the Company's financial statements follows below:

• IAS 32 Financial Instruments: Presentation — The Company adopted, as required, amendments to IAS 32. The amendments clarify that the right to offset financial assets and liabilities must be available on the current date and cannot be contingent on a future event. IAS 32 did not impact the Company's interim financial statements.

• IAS 36 "Impairment of Assets" has been amended to reduce the circumstances in which the recoverable amount of cash generating units "CGUs" is required to be disclosed and clarify the disclosures required when an impairment loss has been recognized or reversed in the period. The retrospective adoption of these amendments will only impact the Company's disclosures in the notes to the financial statements in periods when an impairment loss or impairment reversal is recognized.

• IAS 39 "Financial Instruments: Recognition and Measurement" has been amended to clarify that there would be no requirement to discontinue hedge accounting if a hedging derivative was novated, provided certain criteria are met. The retrospective adoption of the amendments does not have any impact on the Company's financial statements.

• IFRIC 21 "Levies" was developed by the IFRS Interpretations Committee ("IFRIC") and is applicable to all levies imposed by governments under legislation, other than outflows that are within the scope of other standards (e.g., IAS 12 "Income Taxes") and fines or other penalties for breaches of legislation. The interpretation clarifies that an entity recognizes a liability for a levy when the activity that triggers payment, as identified by the relevant legislation, occurs. It also clarifies that a levy liability is accrued progressively only if the activity that triggers payment occurs over a period of time, in accordance with the relevant legislation. Lastly, the interpretation clarifies that a liability should not be recognized before the specified minimum threshold to trigger that levy is reached. The retrospective adoption of this interpretation has had a nominal impact on the Company's financial statements.

Future Accounting Pronouncements

Financial Instruments

IFRS 9, Financial Instruments, was issued in July 2014 and is intended to replace IAS 39, Financial Instruments: Recognition and Measurement, and uses a single approach to determine whether a financial asset is measured at amortized cost or fair value, replacing the multiple rules in IAS 39. The new standard also requires a single impairment method to be used, replacing the multiple impairment methods in IAS 39, and incorporates new hedge accounting requirements. IFRS 9 is effective for annual periods beginning on or after January 1, 2018, with early adoption permitted. The Company is in the process of assessing the impacts of adopting this new standard. In May 2014, the IASB issued IFRS 15 Revenue from Contracts with Customers, this standard will replace IAS 18 Revenue, IAS 11 construction contracts, and related interpretations. The standard is required to be adopted either retrospectively or using a modified transition approach for fiscal years beginning on or after January 1, 2017, with earlier adoption permitted. The company is currently evaluating the impact of the standard on the financial statements.

Revenue

In May 2014, the IASB issued IFRS 15, Revenue from Contracts with Customers, which replaces IAS 18, Revenue, IAS 11, Construction Contracts, and related interpretations as the single source for accounting for revenue for all companies in all industries and replaces current guidance including industry or product specific guidance. IFRS 15 provides specific and detailed guidance in many areas where current standards have been more limited, and thus may provide for less flexibility in developing and applying accounting policies and practices. This standard is required to be adopted either retrospectively or using a modified transition approach and is effective for annual periods beginning on or after January 1, 2017, with earlier adoption permitted. The Company is in the process of assessing the impacts of adopting this new standard.
